Fastex Gun Care

Fastex High Pressure Case Forming Lube

Fastex FHPCFL

Key Features:

- An advanced oil providing a low coefficient of friction
- Does not break down in operations involving high pressure forming
- Will not dent shoulders
- Provides excellent lubrication to prevent sticking and galling in the die
- Fully synthetic formulation for ultimate primer safety
- Non-toxic and non-staining

The following picture illustrates the dramatic forming change that can be achieved with **Fastex High Pressure Case Forming Lube.**

This application was as follows:

The .25.06 casing on the left was converted to a 35 Whelen (illustrated on the right) in one single forming operation without causing any surface deformation or cracking.

Fastex Case Forming Lube is the only liquid forming lube able to swage cases through **Six!** calibres with **one** operation.

Application Procedure:

Simply apply a thin coating of the **Fastex Case Forming Lube** onto the body and neck of the case and de-prime normally, using the calibre of choice. The lube does the rest!

To remove Fastex lubricants from your firearm, clean all metal surfaces with Fastex Barrel Degreaser.

Proper maintenance is essential to ensure that your firearm operates as it was intended and will maintain the value of your investment. Clean your gun as soon as possible after each use and it will be sure to give you a lifetime of reliable service.

Alert: Always ensure that your firearm is unloaded before carrying out any cleaning procedure.
